

Condor-C™

PDC Drill Bits series for South America

Our Condor-C™ PDC drill bits line takes inspiration from the majestic condors of South America, where tradition harmonizes with modernity. With 140 years of heritage, Glinik has always been driven by continuous development and passion for innovation in tools engineering, accepting the toughest drilling challenges.

GLINIK research and development activities pushed the boundaries of available technology in pursuit of unique solutions. Condor-C™ drill bits enhance cutting efficiency, stability and cutting structure durability. The breakthrough LaserC™ hard facing technology ensures significantly higher erosion protection. With a focus on maximizing ROP, the most efficient cutting structures and hydraulics have been selected. Condor-C™ line combines high-quality materials and expert craftsmanship to guarantee our Customers the best performance.

To find out how Condor-C™ series drill bits can achieve your drilling objectives, contact us at sales@glinik.com.pl or visit www.glinik.com.pl

Our mission is to consistently support our Customers in selecting the best drilling tools and continuously optimize drilling performance.

The priority in developing the Condor-C™ drill bits line is to build trust with our Customers in South America by:

- customizing drill bit for individual applications,
- continuously optimizing drilling costs,
- providing expert guidance from engineering team,
- shoe-to-shoe drilling,
- extending the bit's durability.
